Split clamps are a simple, robust method for securing cylindrical components that need to be adjusted axially (e.g., focusing a lens) or rotationally (e.g., a prism holder) that satisfy one of the principles of good locking mechanism design: A locking mechanism's action should not influence the sensitive adjustment that it is intended to secure. ...

Reliable structures, very precise drawings. CYPECAD was brought about to carry out the analysis and design of reinforced concrete and steel structures, subject to horizontal and vertical forces, for houses, buildings and civil work projects.. Its use guarantees maximum analysis reliability and the best drawing design, including the following elements:

An analysis of recent studies on sustainable design considering CO 2 emissions reveals that they focused on columns, girders or beams, and frames, all of which are primary structural elements comprising the structural system of buildings. Most multistory buildings including office buildings, residential buildings, or hotels have core walls or shear walls that are used in elevator passages for ...

Site analysis is a preliminary phase of architectural and urban design processes dedicated to the study of the climatic, geographical, historical, legal, and infrastructural context of a specific site.. The result of this analytic process is a summary, usually a graphical sketch, which sets in relation the relevant environmental information with the morphology of the site in terms of parcel ...

Strategic Management > Value Chain. The Value Chain. To better understand the activities through which a firm develops a competitive advantage and creates shareholder value, it is useful to separate the business system into a series of value-generating activities referred to as the value chain.In his 1985 book Competitive Advantage, Michael Porter introduced a generic value chain model that ...
