Earth's Spheres - COTF

Earth is the third planet from the Sun, and the only astronomical object known to harbor life.According to radiometric dating and other sources of evidence, Earth formed over 4.5 billion years ago. Earth's gravity interacts with other objects in space, especially the Sun and the Moon, Earth's only natural satellite.Earth revolves around the Sun in 365.26 days, a period known as an Earth year.

Earth - Wikipedia

Google Earth is a computer program that renders a 3D representation of Earth based primarily on satellite imagery.The program maps the Earth by superimposing satellite images, aerial photography, and GIS data onto a 3D globe, allowing users to see cities and landscapes from various angles. Users can explore the globe by entering addresses and coordinates, or by using a keyboard or mouse.

Google Earth - Wikipedia

The map of the Earth is always changing; not only are the underlying plates moving, but the plates change in size. Also, the sea level changes over time (as the temperature on Earth varies and the poles melt or freeze to varied extents), covering or exposing different amounts of crust.

From glaciers to mountains to wetlands, our planet has lots of different landforms. Help your child learn all about them with this fun earth science crossword.

Earth Science Crossword: Landforms - Education.com

We all know that the Earth is always rotating. Interestingly, there is evidence that the core spins faster than the other layers of the planet. In 1997, Columbia University collected experimental evidence about the speed of the inner part of the planet. Researchers learned that the core rotates the same way as the rest of Earth but at a different speed.

10 Things You May Not Have Known About The Center Of The Earth

Get an answer for 'How are fossil fuels formed in the earth and how long does the process take?' and find homework help for other Science questions at eNotes
