Fugitive emissions from natural gas systems are the largest anthropogenic source of the greenhouse gas methane (CH₄) in the U.S. and contribute to the risk of explosions in urban environments. Here, we report on a survey of CH₄ emissions from 100 natural gas leaks in cast iron distribution mains in Metro Boston, MA. Direct measures of CH₄ flux from individual leaks ranged from 4.0 - 2.3 ...

1. Introduction. In response to increasing concern about the long-term sustainability of human societies, the United Nations developed the Sustainable Development Goals (SDGs), a 2030 agenda including 17 goals and 169 targets (United Nations, 2016). Despite criticisms of the framework (Kopnina, 2015), these goals currently dominate the sustainability and policy discussions surrounding development.

Trade-offs between social and environmental Sustainable ...

Science in a broad sense existed before the modern era and in many historical civilizations. Modern science is distinct in its approach and successful in its results, so it now defines what science is in the strictest sense of the term. Science in its original sense was a word for a type of knowledge, rather than a specialized word for the pursuit of such knowledge. In particular, it was the ...
