In chemistry, a steady state is a situation in which all state variables are constant in spite of ongoing processes that strive to change them. For an entire system to be at steady state, i.e. for all state variables of a system to be constant, there must be a flow through the system (compare mass balance). A simple example of such a system is the case of a bathtub with the tap running but with ...

Steady state (chemistry) - Wikipedia

Textbook rental is one way Chegg provides students numerous options for obtaining cheap textbooks required by their professors. Price compared to campus bookstores and other online retailers, using Chegg for textbook rental or purchase allows college students to save their money for spending elsewhere on higher education costs.
