Foundation design necessitates two different studies: one deals with the bearing capacity of the soil; the other is concerned with the foundation settlements. Considering that the loads transferred from the superstructure to the foundation are non-uniform, differential settlements between the foundation's elements are expected, which will generate additional forces in the members of the ...

Basically, the heroes have a problem. It could range from personal, to being vital in their quests. Then an antagonist does something, either accidentally or deliberately but with an unintended effect, that instead fixes this problem nicely.It's like a Kick the Dog, but instead of hurting the dog, it pops one of the dog's dislocated bones back into place.
